

MITHRIL

Decentralized social media platform that rewards all content creators.

Mithril (MITH)

Mithril will integrate into new and existing social media networks to reward content creators for contributions to the network – we call this Social Mining. MITH is an ERC-20 token.

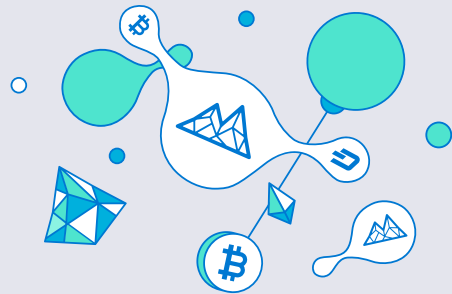

Social Mining : launched in March 2018

PiePie is the first platform that supports social mining. PiePie is an innovative social media platform that launched in March 2018 on both the Apple App Store and Google Play Store. PiePie has been tailored to address the needs of this current generation of social media users, which includes features such as short clips, instant messaging, stories and discovery. Mithril will continue to integrate social mining to other social network platforms.

Use of MITH : payment and asset management

VAULT was released in June, 2018. VAULT is a foundational service in the Mithril ecosystem, supporting Mithril as an electronic wallet, address payment and asset management needs of Mithril users. Users can make payments to various application services or purchase physical goods via VAULT.

MITH is currently listed on Bitfinex, BitForex, Bithumb, BitoPro, DigiFinex, Ethfinex, HitBTC, LBank, MAX, OKEx, ZB.COM and more.

Team & Advisors

Mithril is founded by Jeffrey Huang and the team behind 17 Media, with advisors from Pantera Capital, Sora Ventures, QTUM Foundation, AMIS, and 17 Media.

VAULT

VAULT :

Through VAULT, users will be able to manage their cryptocurrency asset effortlessly. This includes features such as deposit and withdrawal, shifting and staking. In addition, making payments via VAULT will soon be available.

PiePie

Download PiePie :

Users can share their short clips and stories via PiePie Stories, and be rewarded with Mithril tokens based on their influence and success as a contributor on the network.
